

## ABSTRACT

Disclosed is a method, system, program, and data structure for selecting one of multiple data paths to a device. A selection is made of one of multiple paths indicated as enabled to transmit data. A path is indicated as enabled or disabled. Transfer time data is gathered for each enabled path capable of being selected. Paths having transfer time data satisfying a threshold are indicated as disabled. Paths indicated as disabled are not capable of being selected to use to transmit data.

| Country | Year | Population (millions) | Urban population (millions) | Urban population (%) | Population density (per sq km) | Population density (per sq mile) |
|---------|------|-----------------------|-----------------------------|----------------------|--------------------------------|----------------------------------|
| Algeria | 1980 | 11.0                  | 5.0                         | 45.5                 | 10.0                           | 26.0                             |
| Algeria | 1985 | 12.0                  | 5.5                         | 45.8                 | 10.0                           | 26.0                             |
| Algeria | 1990 | 13.0                  | 6.0                         | 46.2                 | 10.0                           | 26.0                             |
